# MEDICAL DEPARTMENT

OF THE

## TULANE UNIVERSITY OF LOUISIANA.

(FORMERLY 1847-84, UNIVERSITY OF LOUISIANA.)

CATALOGUE FOR 1899-1900.

CIRCULAR FOR 1900-1901.

WITH NOTICE OF THE COURSE IN  
PHARMACY OF THE MEDICAL DEPARTMENT.

THE CHARITY HOSPITAL OF LOUISIANA,  
TULANE AVENUE, BETWEEN HOWARD AND LOCUST STREETS, NEW ORLEANS,  
TWO SQUARES FROM THE BUILDING OF THE MEDICAL DEPARTMENT.

AND WITH  
ANNOUNCEMENTS  
OF THE

Academical Departments of the University.

NEW ORLEANS:  
L. Graham & Son, Ltd., Printers, 207-211 Baronne St.  
1900.

THIS CATALOGUE IS PUBLISHED ANNUALLY IN JUNE.

# UNIVERSITY OF LOUISIANA,

(Formerly, 1847-1884, the University of Louisiana.)

## PRESIDENT OF UNIVERSITY,

EDWIN A. ALDERMAN, D. C. L.

---

## ADMINISTRATORS.

His Excellency W. W. HEARD, Governor of Louisiana.	} <i>Ex-Officio.</i>	
Hon. J. V. CALHOUN, Superintendent of Education.		
Hon. PAUL CAPDEVIELLE, Mayor of New Orleans.		
Hon. CHAS. E. FENNER, President.		
JAMES MCCONNELL, First Vice President.		
R. M. WALMSLEY, Second Vice President.		
WALTER D. DENÈGRE.	CHAS. JANVIER.	WALKER B. SPENCER.
E. H. FARRAR.	J. B. LEVERT.	WALTER R. STAUFFER.
CARTWRIGHT EUSTIS.	J. C. MORRIS.	BEVERLEY WARNER, D. D.
WALTER C. FLOWER.	ASHTON PHELPS.	GEO. Q. WHITNEY.
HENRY GINDER.	B. M. PALMER, D. D., LL. D.	

---

## MEDICAL FACULTY.

STANFORD E. CHAILLÉ, M. D., Dean,  
Professor of Physiology, Hygiene and Pathological Anatomy.

ERNEST S. LEWIS, M. D.,  
Professor of General and Clinical Obstetrics and Diseases of Women and Children.

JOHN B. ELLIOTT, M. D.,  
Professor of the Theory and Practice of Medicine and Clinical Medicine.

EDMOND SOUCHON, M. D.,  
Professor of Anatomy and Clinical Surgery

LOUIS F. REYNAUD, M. D.,  
Professor of Materia Medica, Therapeutics and Clinical Medicine.

RUDOLPH MATAS, M. D.,  
Professor of General and Clinical Surgery.

A. L. METZ, M. PH., M. D.,  
Professor of Chemistry and Medical Jurisprudence.

---

## LECTURERS, INSTRUCTORS, DEMONSTRATORS.

LUTHER SEXTON, M. D., Lecturer and Clinical Instructor on Minor Surgery.

EDW. W. JONES, M. D., Lecturer and Clinical Instructor on Diseases of Eye and Ear.

ISADORE DYER, M. D., Lecturer and Clinical Instructor on Dermatology.

H. S. LEWIS, M. D., Demonstrator of Obstetrics.

J. B. ELLIOTT, JR., M. D., Lecturer and Clinical Instructor on Physical Diagnosis.

E. D. FENNER, M. D., Lecturer and Clinical Instructor on Diseases of Children.

GEO. S. BEL, M. D., Lecturer and Clinical Instructor on Physical Diagnosis.

P. E. ARCHINARD, M. D., Demonstrator of Microscopical Anatomy and Bacteriology.

O. L. POTHIER, M. D., J. J. ARCHINARD, M. D., Assistant Demonstrators of Microscopical Anatomy and Bacteriology.

HENRY BAYON, M. D., Demonstrator of Anatomy.

S. P. DELAUP, M. D., M. SOUCHON, M. D., JNO. F. OECHSNER, M. D., Assistant Demonstrators of Anatomy.

H. B. GESSNER, M. D., Demonstrator of Operative Surgery.

W M PERKINS, M. D., Assistant Demonstrator of Operative Surgery.

T. A. QUAYLE, M. PH., M. D., Demonstrator in charge of the Pharmaceutical Laboratory.

H. P. JONES, M. D., and OTTO LERCH, M. D., Assistant Demonstrators in the Chemical Laboratory.

## MEDICAL DEPARTMENT.

1. This institution, founded in 1834 as the "Medical College of Louisiana," became in 1847 the "Medical Department of the University of Louisiana," and in 1884 the "Medical Department of the Tulane University of Louisiana." It is the oldest medical college in the Southwest, and has the greatest number of alumni and of students. To May, 1900, it had registered the names of 13,159 students, and of these it had conferred diplomas on 3717—namely, on 3401 graduates in medicine and 316 graduates in pharmacy.

2. The next annual course of instruction in this department, now in the sixty-sixth year of its existence, will begin on Thursday, November 1st, 1900.\* The Commencement will be held on Wednesday, May 1st., 1901. There will be only four holidays—Christmas, New Year, Mardi Gras, and Founders' Day. The first two weeks of the term will be devoted especially to Clinical Medicine, Surgery, Obstetrics and Gynecology in the wards and amphitheatre of the Charity Hospital, and to practical work in the laboratories of Practical Anatomy (Dissecting Rooms), of Chemistry, of Pharmacy, and of Histology and Bacteriology. These laboratories will be open for instruction on Monday, November 5th, 1900.

### Recent Improvements.

3. The antiquated amphitheatre, erected in 1847 in the Charity Hospital, was replaced in 1895 by a model building, seating more than 400 students, and admirably adapted to the exacting needs of modern surgery, as also to the greatly improved instruction of medical students.

The Library of the Medical Department was, in 1896, reorganized and replenished as a library of reference, to the great advantage of students, alumni and the medical profession.

The Milliken Memorial, an annex to the Charity Hospital, was opened in 1899 for the accommodation of 200 sick children, thereby increasing the great educational value of the Charity Hospital.

### New Building With Its Laboratories.

4. The Medical Department has, since October, 1893, occupied a new site, twice the size of the former one and only two squares from the Charity Hospital, and thereon has been erected a four-story building (three stories above a most excellent basement), which provides ample accommodations for larger classes and for all the needs now requisite to medical education; larger and better lecture and recitation rooms, and, best of all, ample and well-equipped laboratories for Chemistry, for Pharmacy, for Practical Anatomy, for Operative Surgery, for Microscopical Anatomy, Pathology and Bacteriology, and working rooms for Practical Physiology and for gross Pathological Anatomy. These admirable laboratories, now added to the unrivalled practical advantages for clinical, anatomical, and pathological studies given by the Charity Hospital, enable the Medical Department to provide its students with unsurpassed advantages for their medical education. For other details of the new building see pages 3 and 4 of the cover.

### Educational Advantages Throughout the Year.

5. During the intervals between the annual sessions, as well as during the sessions, the Dissecting Rooms and the Charity Hospital are both open to registered students, who are thus enabled throughout the year to prosecute the practical studies of utmost importance, viz.: Anatomy and Clinical Medicine, Surgery, etc., as indicated in the following paragraph.

---

\*All who intend to become medical students are warned against crediting unfavorable and exaggerated statements concerning the health of New Orleans; and are assured that during the sixty-six years' existence of this college no student has ever died of yellow fever during lecture term, which always occurs at a season when this disease is no longer to be feared and when New Orleans is as healthy as are other large cities.

### Clinical Instruction at the Charity Hospital.

6. The faculty solicits the special attention not only of students, but also of graduates of other colleges, to the unequalled clinical and anatomical advantages of the Medical Department.

It is universally admitted that without abundant anatomical and clinical material no medical school, however numerous or eloquent its professors, can possibly fit its pupils for practical professional life. It is scarcely necessary to state that it is only in large cities that such advantages can be procured, but it is of paramount importance that the opportunities there afforded should be properly utilized; that the students should be required, under the direction of the teacher, to examine patients for themselves, to keep record of cases, to note daily changes which may occur, and thus acquaint themselves by personal observation with the progress and termination of diseases and accidents. The mere introduction of a patient into an amphitheatre, and the discussion of his case by the professor in the presence of a large class, is no substitute for bedside instruction, such as is offered by the great Charity Hospital of New Orleans; and no reduction of lecture fees, not even their entire abolition, can possibly compensate for the lack of such opportunities. The use of the wards of this noble institution, with its *nine hundred beds*, and the annual occupancy thereof by from nine to ten thousand patients, and the use of the two clinical buildings, with more than twenty thousand annual out-door patients, have been given by acts of the Legislature to the professors of the Medical Department of the Tulane University of Louisiana, for the practical instruction of its students, not only in Medicine and Surgery, but also in Obstetrics and Gynecology. Medical students are given access to the Charity Hospital, without payment of any hospital fees, and far better opportunities for the study of diseases therein than are usually enjoyed in the hospitals of other cities. For the study of the diseases of the Southwest, and also of the diseases of the negro race, there is no field comparable to the wards of this hospital. Between the building of the Medical Department and the Charity Hospital there are only two squares, which distance is readily walked in three minutes.

The following table of 9149 cases treated in the wards of the Charity Hospital during the year 1899 will give some idea of the great advantages possessed by the Medical Department for the practical study of Medicine and Surgery:

DISEASES.	Number of Cases.	DISEASES.	Number of Cases.
Fevers and other general diseases.....	1,926	Venereal.....	404
Tumors.....	326	Bones and joints.....	198
Nervous system.....	624	Toxic diseases.....	61
Circulatory organs.....	376	Eye, ear and nose.....	212
Respiratory organs.....	1,096	Skin.....	92
Digestive organs.....	934	Local diseases and injuries.....	1,527
Genito-Urinary organs.....	654	All other diseases.....	35
Women (231 obstetrical cases).....	684	Total .....	9,149

There were 1290 deaths and 231 births, and a daily average of  $586\frac{1}{4}$  in-door patients. In addition to the 9149 "in-door" patients, there were 21,803 "out-door" patients, to whom 69,999 consultations were given. In addition to these there were 3514 "accident" cases attended in the Surgical Amphitheatre. The 21,803 out-door patients furnished for instruction the following valuable material, viz: Medical cases, 5792; surgical, 5316; nervous, 243; venereal, 1426; dermatological, 708; gynecological, 1722; diseases of children, 2980; eye, ear, nose and throat, 2355; dentistry, 1261. It should be noted that the sum total of all cases treated in 1899 in the Charity Hospital was 33,702.

Of the grand total of in-door or out-door patients in the Charity Hospital 12,576 were colored. There are sixteen wards for females. Of the fifty-two wards in the Charity Hospital there are twenty-three medical, fourteen surgical,

two obstetrical and two gynæcological wards, two for children, four for diseases of the nervous system, two for venereal diseases, two for diseases of eye and ear, and one for skin diseases; and all these wards are accessible to students.

There are besides two admirable two-storied clinical buildings for out-door patients. Each of the buildings is subdivided into eight different services, and seven of these are alike in both buildings, viz.: A service for medical cases; for nervous diseases; for surgical cases; for venereal and skin diseases; those of the eye; of the ear, nose and throat; and for cases of dentistry. In addition to these seven services the "Men and Boys' Clinic" has a surgical service for boys, and the "Women and Children's Clinic" has a gynæcological service.

The unequalled advantages of the Charity Hospital, as one of the greatest schools in the world for practical instruction, were notably increased in 1899 by the addition of the Milliken Memorial; a superb modern and model building for the accommodation of 200 sick children.

It is manifest that these facilities for *genuine* clinical teaching, which recent improvements in the hospital have greatly increased, are now unsurpassed by any medical college in the United States.

7. The professors and clinical instructors are Attending Physicians or Surgeons of the Hospital, and visit their wards daily, accompanied by the students, who are thus brought into immediate contact with the sick and wounded, and are taught practically auscultation and percussion, analysis of urine, the use of the microscope in diagnosis, the application of dressings, etc. Surgical operations are performed and lectures delivered upon selected cases in the amphitheatre of the hospital.

Special clinical instruction is given to the candidates for graduation and to all students, who are for this purpose divided into classes and assigned to the respective professors and clinical instructors, in charge of wards of the hospital. The classes thus formed interchange courses so that all students enjoy equal advantages. Competent Chiefs of Clinic aid the clinical teachers in developing this system of instruction. The following professors and clinical instructors and their respective chiefs of clinic and assistants will be on duty the ensuing session:

PROF. ERNEST S. LEWIS, M. D.	}	JNO. B. ELLIOTT, JR., M. D.	} Chiefs of Clinic.
		C. J. MILLER, M. D.	
		L. J. BURTHE, M. D.	
		E. H. WALET, M. D.	
		P. E. ARCHINARD, M. D.	
		W. W. BUTTERWORTH, M. D.	
		C. L. HORTON, M. D.	
		MARION SOUCHON, M. D.	
		J. MOORE SONIAT, M. D.	
		OTTO LERCH, M. D.	
PROF. JOHN B. ELLIOTT, M. D.	}	N. F. THIBERGE, M. D.	}
		FELIX LARUE, M. D.	
PROF. EDMOND SOUCHON, M. D.	}	H. B. GESSNER, M. D.	}
		J. LAZARD, M. D.	
PROF. L. F. REYNAUD, M. D.	}		}
PROF. RUDOLPH MATAS, M. D.	}		}
Clinical Instructors.	}	DR. LUTHER SEXTON .....	} Assistant Clinical Instructors.
		DR. EDW. W. JONES.....	
		DR. ISADORE DYER.....	
		E. A. BLOUNT, M. D.	
		DR. H. S. LEWIS.....	
		DR. JOHN B. ELLIOTT, JR.....	
		H. B. ORR, M. D.	
		DR. E. D. FENNER .....	
		G. K. LOGAN, M. D.	
}	}	DR. G. S. BEL.....	}
		CHAS. A. BOREY, M. D.	

The regular lectures at the Hospital, on Clinical Medicine, by Professors Elliott and Reynaud; on Surgery, by Professors Matas and Souchon, and on Obstetrics and Diseases of Women and Children, by Professor Lewis, will be delivered in the amphitheatre, daily, between 8:30 A. M. and 12 M.

*Post-mortem* examinations are made in the presence of the class by the Professor of Pathological Anatomy.

Diseases of the Eye and Ear are taught in the eye-wards and amphitheatre of the hospital, and constitute a part of the curriculum of the surgical chair.

Special instruction in diseases of the skin, diseases of children, physical diagnosis, minor surgery and obstetrical manipulations is given by the Lecturers on these subjects.

8. The Administrators of the Charity Hospital elect annually, by competitive examination in February or March, sixteen resident students, who are entitled to board and lodging in the institution free of charge, and sixteen externes, who serve as assistants in the out-door clinics. Four resident students in the Touro Infirmary are also elected annually by competitive examination.

### **Lectures and Laboratories.**

9. *Lectures.*—Systematic didactic instruction will be given daily, immediately after the Hospital clinics, in the new building of the Medical Department on Canal street, between Villere and Robertson Streets, only two blocks from the hospital. The means for illustrating the didactic lectures consist of numerous models in wax, papier maché, plaster and wood of rare and beautiful workmanship, executed in London, Paris and Florence expressly for the Medical Department; very many tables and diagrams; a complete series of specimens in *materia medica*; surgical and obstetrical instruments and appliances; a large collection of natural, anatomical and pathological specimens and preparations, and a set of chemical and physical apparatus.

### **Chemical Laboratory.**

10. This laboratory readily accommodates ninety-six students working at the same time, and two courses therein are obligatory on all students of the four-year course. These two courses are graded and both are devoted to teaching such knowledge of chemistry as will prove of greatest service to the practicing physician. The first course is devoted to general chemistry and the second course to physiological and medical chemistry. The Chemical Laboratory is under the direction of the Professor of Chemistry, aided by Drs. H. P. Jones and Otto Lerch, Assistant Demonstrators.

### **Pharmaceutical Laboratory.**

11. This laboratory is thoroughly well organized and possesses a complete outfit for practical instruction. It is under the directorship of Dr. T. A. Quayle, Master of Pharmacy. See also paragraphs 36 to 41.

### **Microscopical Laboratory.**

12. This laboratory readily accommodates one hundred and twenty-two students working at the same time, and one course therein is obligatory on all candidates for graduation in the three-year course. Two courses are obligatory on all candidates for graduation in the four-year course; the first course will be a complete course on normal histology, and the second course will be on pathological histology, bacteriology and clinical microscopy. This laboratory is in charge of Dr. P. E. Archinard, a pupil of Pasteur and Koch, assisted by Drs. O. L. Pothier and J. J. Archinard.

### **Laboratory of Practical Anatomy.**

13. This laboratory is unusually well ventilated and lighted, and is the largest of all the laboratories, allowing more than two hundred students to dissect at the same time. It is in charge of Dr. H. Bayon, assisted by Drs. S. P. Delaup, M. Souchon and J. F. Oechsner. Demonstrations of the cavities and of the viscera are given on specially prepared subjects. First-course students are given preparatory instruction on Osteology by Dr. M. Souchon, and are supplied with boxes of bones which they are permitted to study at their rooms.

## Operative Surgery.

14. Is practically taught in the Miles Laboratory of Operative Surgery. The instructors in charge are Dr. H. B. Gessner, Demonstrator, and Dr. W M Perkins, Assistant Demonstrator. The entire field of General Operative Surgery will be gone over, the steps of each operation being first admirably illustrated by means of an Electric Optical Projector and fully explained by the Demonstrators, after which the students, in sections, will perform the operation in the presence of the Demonstrators and the class. Quiz reviews, supplementary to the laboratory work, are added to this course and have proved most useful.

### Requirements for Matriculation.

Every student before being matriculated for the first course of Medical Lectures shall be required to possess the following qualifications:

15. He shall hold a certificate as the pupil of some known reputable physician, showing his moral character and general fitness to enter upon the study of medicine. (See form No. 1.)\*

16. He must possess a diploma of graduation from some literary or scientific institution of learning; or a certificate from some legally constituted High School, General Superintendent of State Education or Superintendent of some County or Parish Board of Public Education, attesting that he has been examined and is possessed of at least the educational attainments required of first grade teachers of public schools, or a certificate that he has passed the entrance examination to a State university. (See form No. 2.)†

17. A set of tickets showing that the holder has attended one full course of medical lectures in any regular and recognized medical college, is essential to matriculating for a second course of lectures; and every student prior to matriculating for a third or fourth course of lectures, shall be required to show by similar evidence that he has previously taken two or three courses of lectures.

18. The following classes of students may apply for advanced standing and obtain it, provided every applicant undergoes a satisfactory examination upon every branch below the class desired to be entered:

(a) Graduates of Pharmacy, of Dentistry and of Veterinary Medicine.

(b) Graduates and matriculates of Colleges of Homeopathy and of Eclectic medicine.

(c) Graduates of recognized Colleges and Universities, who have completed therein prescribed courses in elementary branches of medicine, including Chemistry and Biology.

\*Form No. 1. .... 190 ...

Secretary (or Dean) of .....

City ..... State .....

Dear Sir:

Mr ..... of .....

is a gentleman of good moral character. I recommend that he be allowed to enter upon his medical studies in your college. He has been my pupil ..... months.

Yours

(Sign here) .....

† Form No. 2. .... 190 ...

Secretary (or Dean) of .....

City .....

Dear Sir:

I have examined Mr. ....

of ..... and find his scholastic attainments equal to those requisite for a first grade teacher's certificate in our public schools.

Yours.

Supt. Pub. Education.

### Requirements for Graduation.

19. Every candidate for graduation must be of good moral character and must have attained the age of twenty-one years.

20. He, if entitled to be graduated after three sessions, must have attended in a regular and reputable medical college, three full courses of lectures, of not less than six months (twenty-six weeks), in three separate years, and the last of these courses must have been in this institution. Four sessions and four full courses, instead of three as above, will be required of every candidate who attended his first full course in a medical college after the session of 1898-99. Said six months' course of lectures, to be estimated in the requirements for graduation, must not be taken continuously, but there must intervene at least three months between the closing of one course and the opening of the succeeding course.

The four years' course is required of every student who matriculated for his first full course in a medical college after January 1, 1899, and the three years' course of those students who attended their first course during or prior to the session of 1898-99. But all students who may have taken their first full course during or prior to the session of 1898-99 and who may fail to be graduated on or before the college commencement of 1903 shall be required to attend and pay for a fourth course.

21. Every candidate, if entitled to be graduated after three sessions, must have dissected in two courses and have attended two courses of clinical or hospital instruction, and one course in each of the three following special laboratory departments, viz: Chemistry, Histology and Bacteriology; Operative Surgery.

Every candidate, to be graduated in 1903 and thereafter, will be required to attend a greater number of laboratory courses (see par. 34).

22. Every candidate for graduation must submit a thesis (composed exclusively by himself, and in his own handwriting) to the dean, between January 1 and March 1 of his last session; \* must have paid all college dues, including the graduation fee, and must pass satisfactory examinations before the members of the faculty.

N. B.—A candidate for graduation, who may fail to pass satisfactory final examination after three annual trials, will not be examined again.

### Examinations After Two Annual Courses.

23. Students who have attended and paid for two full courses, the last of which was in this institution, who have records of satisfactory attendance on two courses in a laboratory of practical anatomy (dissecting), of one course † in a laboratory of chemistry and of one course in a laboratory of histology and bacteriology, are permitted to undergo examinations by one or more of the professors who teach Chemistry and Medical Jurisprudence; Anatomy; Physiology; Hygiene, and Pathological Anatomy; Materia Medica and Therapeutics. A fee of \$15 in part payment of the fee for "Examination, Graduation and Diploma," specified in paragraph 25, will be charged for any certificate given of satisfactory examinations on one or more of the above specified branches. These examinations, if successful, will not be repeated, but if the applicant should fail upon one or more of them he will be granted a second trial, when he shall present himself for final examination.

Students who enter the third year, but who have not passed the above preliminary branches in this college, will be given opportunity to undergo the above examinations early in the third year as well as at its close.

\* The names of authors of very meritorious theses are publicly mentioned at Commencement. Students about to become candidates for graduation are urged to prepare their theses during the summer vacation, and on a medical subject within their own personal experience or research.

† Two courses in the Chemical Laboratory will be required of students attending the four years' course.

Every graduate of the Medical Department must have been examined by *all* of its professors on *all* their branches, notwithstanding that these candidates may have passed some or all of these branches in other medical colleges.

### Attendance on More Than Three or Four Annual Courses.

24. Students who have attended and paid for all of the required full courses, the last of which was in this institution, are thereafter entitled to attend the lectures without charge for the professors' fees; and it is the earnest desire of the faculty that they should avail themselves of this privilege.

### Fees.

25. The fees of this institution amounted to a total of \$465 for the three years' course, and will amount to about \$575 for the four years' course.

Considering the exceptional advantages for practical instruction in hospital and laboratories, and the constant care and labor bestowed upon the pupils, the charges are as low as are compatible with the superior advantages given; and the faculty therefore appeal to their professional brethren throughout the Southwest to continue their support to an institution which does not seek to increase the size of its classes by pecuniary rivalry and discreditable underbidding, but by offering a full equivalent for its charges.

Table of Fees for the Three Years' Course.

	FIRST YEAR'S FEES WERE.	SECOND YEAR'S FEES WERE.	THIRD YEAR'S FEES ARE.
Matriculation fee.....	\$5 00	\$5 00	\$5 00
Professors and Lecturers.....	120 00	120 00	120 00
Demonstrator of Anatomy.....	10 00	10 00	.....
Chemical Laboratory.....	15 00	.....	.....
Microscopical Laboratory.....	.....	15 00	.....
Operative Surgery.....	.....	.....	10 00
Examination, Graduation and Diploma Fee.....	.....	.....	30 00
Total.....	\$150 00	\$150 00	\$165 00

### Fees of the Four Years' Course for the Session of 1900-1.

26. First year, \$130, plus one breakage fee, \$5. See Paragraph 30.  
 Second year, \$145,\* plus two breakage fees, \$10. See Paragraph 30.  
 Third year, \$135, plus one breakage fee, \$5. See Paragraph 30.  
 Fourth year, \$135.  
 Fourth year, \$30, graduation fee.

Total for the 4 years \$575

The faculty reserves the right to decrease or to increase the above fees for the four years' course after the session of 1900-1; but it is not probable that the total fees for any one session will exceed \$150.

### Regulations as to Fees for Students, Both of the Three and Four Years' Course.

27. All fees are payable on admission, except the graduation fee, \$30, which is not accepted earlier than January 1st, nor later than March 1st. Ten dollars

\* The \$145 charged in 1900-1 for the second year includes one laboratory course (\$15) more than required of first year students.

of this fee will not be returned to candidates for graduation who may fail to pass satisfactorily the final examinations.

28. Students who have attended and paid for the two courses, that are obligatory for graduation, in a Laboratory of Practical Anatomy (dissecting), will be charged only \$5 (instead of \$10) for an additional course.

29. *Matriculation Fee.*—Every person, whether student or graduate, admitted to the privileges of this College, must pay a matriculation or registration fee of \$5 for every session he may attend; and he will not be entitled to admission to either College or Hospital until registered.

30. *Breakage Fees.*—A breakage fee of \$5 must be deposited for every course in the Chemical, in the Pharmaceutical and in the Microscopical Laboratory to reimburse needless injuries inflicted on the laboratories and their contents. At the end of every session the breakage fee will be refunded in whole or in part, depending on the charges incurred by the student.

31. Graduates of this College and all medical students, who have paid for all of the required full courses, will not be charged the professors' fees, but will be charged the matriculation fee and the fees for all laboratory courses they may voluntarily attend.

32. Students who do not attend full courses, but only *partial* or *special* courses, must pay for the tickets of the professors whom they may attend, \$20 each; and for other fees as in the Table of Fees. Partial-course students are admitted at any time during the session.

33. Graduates of other recognized medical colleges must pay the matriculation fee, \$5, and for the professors' fees, \$70, and thereafter will be entitled to the same privileges given to the graduates of this College. See Par. 24. They can not, however, obtain its diploma without passing the final examinations, and without paying the graduation fee.

### Studies of the Four Years' Course.

34. *First Year*—Physics, Chemistry and Toxicology, Materia Medica, Anatomy, Post Mortem Demonstrations of Pathological Anatomy, Physiology, Hygiene, Minor Surgery and Physical Diagnosis in the wards of the hospital, a course in the Laboratory of Practical Anatomy (dissecting), and a course in the Laboratory of Chemistry (see par. 10).

*Second Year*—Studies of the first year continued, with the addition of Therapeutics; other clinical studies and one course in the Laboratory of Microscopy (normal histology).

*Third Year*—Practice of Medicine, Surgery, Obstetrics, Gynecology and Diseases of Children, Pathological Anatomy, Medical Jurisprudence, Laboratory of Operative Surgery, Microscopical Laboratory (bacteriology, pathological histology and clinical microscopy), and two hours and a half daily in the Amphitheatre and Wards of the Charity Hospital, with its 30,000 patients annually.

*Fourth Year*—As there will be no regular fourth year's class until the session of 1902-3, the final arrangement of the studies of the fourth year, as well as of the third year, is postponed. In the meantime students from other colleges who may be admitted to the fourth year will be assigned to the studies above specified for the third year.

### New Orleans Polyclinic.

35. Students of the Polyclinic, who are graduates of the Medical Department, are admitted to the lectures and clinical instruction of said department on payment thereto of \$5 for its annual session; and Polyclinic students, who are not graduates of the Medical Department, will be admitted to the same privileges during a six-weeks term of the Polyclinic on payment of a fee of \$15 to the Medical Department. All students of the Medical Department, graduating at the

opening of or during a term of the Polyclinic, will be admitted thereto on payment of one-half of its regular rates. For further information in regard to the Polyclinic, address its secretary, Dr. Isadore Dyer, 124 Baronne street.

### Instruction in Pharmacy.

The University is also authorized by law to grant diplomas in Pharmacy, and the Medical Department has exercised this privilege since 1838, having now 316 graduates, and 20 to 40 students in Pharmacy annually.

36. The students in Pharmacy are required to attend two annual courses of lectures given by the professors on Chemistry and Medical Jurisprudence, on *Materia Medica* and Therapeutics, and on Hygiene, and to attend one course in the Chemical and two courses in the Pharmaceutical Laboratory.

Instruction in the Pharmaceutical Laboratory is graded, and consists of a junior and a senior course. These courses are designed to fit the student to conduct the processes of manufacturing and of dispensing in the most thorough and economical manner.

37. Reputable women are admitted as students to the full course in Pharmacy on the same terms and conditions required of male students.

38. Pharmacy students are subjected to the educational "requirements for matriculation" enforced on medical students (see pars. 15, 16), and all candidates for graduation in Pharmacy must comply with the requirements specified in paragraphs 19, 22 and 36, and must also submit to the Dean a satisfactory certificate of at least two years' practical experience under the instruction of a competent pharmacist.

39. *Fees*.—The charge for the first full course in Pharmacy is \$75, viz., for matriculation \$5, professors' fees \$35, chemical laboratory \$15, and pharmaceutical \$20; and for the second course \$80, excluding the chemical laboratory, \$15, and including the graduation fee, \$20. In addition every student must deposit a breakage fee of \$5 for the Chemical and \$5 for the Pharmaceutical Laboratory, in accordance with paragraph 30.

40. Students in Medicine who take also the course in Pharmacy are required to pay only the laboratory fees. Students in Pharmacy are not charged for the tickets of professors after attendance upon two full courses; but all students are charged for every laboratory course, however numerous these may be.

41. The Chemical and Pharmaceutical Laboratories will be open for instruction on Monday, November 5th, 1900.

### Text Books.

42. The books mentioned below are recommended in preference to others; but *recent editions of any standard works* may be used in their stead. Only one text-book on each branch is indispensable. The cost of a set of text-books on all the branches is about \$50. The prices affixed below are now the lowest prices of the cheapest copies, usually in cloth:

DICTIONARIES—Dunglison, \$5.25; Gould's Students, \$2.80; Gould's Illustrated, \$10; National, \$12.

PHYSICS.—Avery, \$1; Gage, \$1.15; Ganot, \$4.50.

CHEMISTRY—Simon, 2.75; Witthaus' Manual, \$3.75; Pellew, \$2.50; Bloxham, \$3.00

MEDICAL JURISPRUDENCE—Reese, \$3.00; Taylor (Bell Edition), \$3.70.

CHEMICAL LABORATORY—Simon, \$2.75; Pellew, \$2.50.

PHARMACEUTICAL LABORATORY—Remington's Practice of Pharmacy, \$5.25; United States Pharmacopœia, \$2.50; Caspair, \$4.00; Coblenz, \$3.50.

MICROSCOPICAL LABORATORY—Histology—Prudden, \$1.25; Klein, \$1.75; Schaeffer, \$2.40; Piersol, \$3.25; Bacteriology—Abbott, \$2.25; Sternberg, \$5.50; McFarland, \$2.50; Pathological Histology—Green, \$2.50; Evans, \$1.50; Coplin, \$3.00.

ANATOMY—Morris, \$6.00; Gray (Colored Plates), \$5.50; Holden, \$2.70; Souchon's Resumé, \$2.50.

PATHOLOGICAL ANATOMY—Green, \$2.25; Stengel, \$4.00; Coats, \$5.00; Ziegler, \$5.00.

PHYSIOLOGY—Brubaker, 80c.; Kirke, \$3.00; Yeo, \$2.50; Waller, \$4.00; Foster, \$3.25; American Text-book, \$6.00; Chapman, \$4.00; Stewart, \$3.50.

HYGIENE—Wilson, \$3.00; Rohe, \$3.00; Parkes, \$5.00; Egbert, \$2.25; Abbott's Transmissible Diseases, \$2.00.

MATERIA MEDICA AND THERAPEUTICS—Bartholow, \$4.25; White and Wilcox, \$3.00; Hare, \$3.00; National Dispensatory, \$5.75.

PRACTICE—Flint, \$4.00; Osler, \$5.00; Pepper, \$10.00; Loomis and Thompson, \$20.00.

PHYSICAL DIAGNOSIS—Page, \$1.75; Loomis, \$2.50; Flint on Respiratory Organs, \$4.00.

DERMATOLOGY—Morris, \$3.00; Schamberg, \$1.00.

SURGERY—American Text-book, \$7.00; Park, \$7.00; International Text book, \$10.00; DaCosta, \$4.00; Surgical Pathology—Senn, \$4.50; Warren, \$6.00; Tillman, \$5.00; Minor Surgery—Wharton, \$2.70; Asepsis and Antisepsis—Beck—\$1.25; Operative Surgery—Treves' Manual, \$6.00; Operations of Surgery—Jacobson, English Edition, \$11.90; American Edition, \$3.00; Bryant, \$10.00; Venereal Diseases—Taylor, \$5.50; General Reference—Dennis' System of Surgery, \$24.00.

DISEASES OF THE EYE—Noyes, \$6.00; Nettleship, \$2.00; De Schweinitz, \$4.00; Gould & Pyle, 80c.

DISEASES OF THE EAR—Politzer, \$4.75; Buck, \$1.80; Gruber, \$5.00.

DISEASES OF THE NOSE AND THROAT—Seiler, \$2.00; Sajous, \$4.00; Bosworth, \$4.00; Bacon, \$1.75.

OBSTETRICS—Jewitt, \$5.00; Playfair, \$3.75; Hirst, \$5.00; American Text-book, \$7.00.

GYNÆCOLOGY—Garigues, \$4.00; Dorland, \$2.50; Penrose, \$3.50; Keating & Coe, \$6.00; Kelly, \$15.00; Dudley, \$5.00.

DISEASES OF CHILDREN—Holt, \$6.00; Smith (J. Lewis), \$3.60; American Text-book, \$7.00. Orthopædic Surgery—Bradford & Lovett, \$5.40.

### Students Preparing to Enter College.

43 Are recommended to study especially Avery's or Gage's Physics; Simon's Chemistry; Morris' or Gray's Anatomy; Brubaker's and Kirke's Physiology, or any other standard works on these four subjects.

The study of physics is specially urged on all intending to enter a medical college.

### Expenses, Etc.

44. Information about houses for boarding and lodging may be obtained by application to the Janitor. The price usually paid by students varies from \$18 to \$22 per month.

45. For any additional information address "PROF. CHAILLÉ, DEAN, P. O. Drawer 261." Letters thus *officially* addressed secure prompt attention even if the Dean be absent from New Orleans.

STANFORD E. CHAILLÉ, M. D.,  
*Dean of the Medical Department.*

NEW ORLEANS, LA., *June, 1900.*

## GRADUATES OF 1900.

At the Sixty-sixth Annual Commencement, held Wednesday, May 2, 1900, the Salutatory was delivered by Dr. Wm. Hy. Seemann, of Louisiana, the Annual Address by Hon. Chas. Payne Fenner, and the Valedictory by Dr. Jas. Birney Guthrie, Jr., of Louisiana.

Degrees were conferred on 119 graduates, viz., 110 in medicine and 9 in pharmacy, as follows:

## Graduates in Medicine—110.

NAME.	POST OFFICE.	COUNTY.	STATE.
ADAMS, THOS. S.	New Orleans	Orleans	Louisiana
ALLEN, LEMUEL S.	Demopolis	Marengo	Alabama
ANDERSON, WM. S.	Holly Springs	Marshall	Mississippi
AUSTIN, MARSHAL L.	Denson Spring	Anderson	Texas
BALLOWE, HEWITT L.	Diamond	Plaquemines	Louisiana
BARR, ARTHUR H.	Agricult'l College	Oktibbeha	Mississippi
BERTRAND, WOODS	Cloutierville	Natchitoches	Louisiana
BERWICK, J. CLARENCE	Lake Village	Chicot	Arkansas
BLACKWELL, J. MELVIN	Sulphur Springs	Hopkins	Texas
†BLUM, HENRY N.	Baton Rouge	East Baton Rouge	Louisiana
BOSLEY, WM. CLEMENT	Austin	Travis	Texas
BRUMFIELD, D. CLYDE	Tylertown	Pike	Mississippi
BURLEIGH, WM. A.	Morrow	St. Landry	Louisiana
BURNHAM, CHAS. E.	Harpersville	Scott	Mississippi
BURT, THOS. R.	Columbia	Marion	Mississippi
CHAPMAN, ABNER L.	Lake End	Red River	Louisiana
*CLARK, SAMUEL, M. D., JR.	New Orleans	Orleans	Louisiana
CLEMENT, ELISHA L.	Lake Charles	Calcasieu	Louisiana
COLLIER, HARRIS T.	Memphis	Shelby	Tennessee
CULVER, FLORENCE L.	Greensboro	Greene	Georgia
§CUSHMAN, WILLARD S.	New Orleans	Orleans	Louisiana
DANIEL, JAMES M.	Starhill	West Feliciana	Louisiana
DARCANTEL, GUY A.	New Orleans	Orleans	Louisiana
DEWEY, GEORGE L.	Norwich	New London	Connecticut
§DUFFEL, LOUIS E. H.	Hohen Solms	Ascension	Louisiana
DYE, T. MELVILLE	Coldwater	Tate	Mississippi

# TULANE UNIVERSITY OF LOUISIANA.

---

EDWIN A. ALDERMAN, D. C. L., PRESIDENT.

Tulane University of Louisiana embraces University Courses. College of Arts and Sciences, College of Technology, H. Sophie Newcomb Memorial College for Young Women, Law and Medical Departments.

The literary and scientific branches of the University are located in the new buildings on St. Charles Avenue, opposite Audubon Park.

The College of Arts and Sciences offers Classical, Literary, Latin-Scientific and Scientific courses, leading to the Degree of Bachelor of Arts or Bachelor of Science.

The College of Technology has five courses, viz.: Mechanical Engineering (including Electrical Engineering), Chemical Engineering, Civil Engineering, Architectural Engineering, and Sugar Engineering, leading to the degree of Bachelor of Engineering.

The University is well equipped with Libraries, Museums, extensive Laboratories, Work Shops and Scientific Apparatus.

Tuition, \$105 a session, with small laboratory fees.

The University grants about 175 scholarships in its Academic Departments

## H. SOPHIE NEWCOMB MEMORIAL COLLEGE.

"The H. Sophie Newcomb Memorial College in the Tulane University of Louisiana, for the higher education of white girls and young women." has been established as a department of Tulane University through the munificence of Mrs. Josephine Louise Newcomb, of New York City.

There are three courses: Classical, Scientific and Modern Language, leading to the degree of Bachelor of Arts or Bachelor of Science.

Special courses are offered to those who find it desirable or necessary to restrict their work to one or more branches.

There is a High School Department which prepares students for the College. The charge for tuition in the College is \$100, and the High School \$80.

Provision has been made for the accommodation of boarding students in the building erected for the purpose, and known as the Josephine Louise House, opposite to the College.

## LAW DEPARTMENT.

The *Law Department* was organized in 1847. Under a series of distinguished professors it has been in successful operation ever since.

The Degree of Bachelor of Laws, granted by the University, entitles the person on whom it is conferred to admission to the bar of this State. The faculty aim to prepare the students for admission to the bar, not only in this State, but also in any of the common law States of the Union. The charge for lectures and instruction is \$80. The annual session begins in November and closes in May. Prof. Harry H. Hall is Dean.

## MEDICAL DEPARTMENT.

The Medical Department was organized in 1834. Prof. S. E. Chaillé, M. D., Dean. See this catalogue.

For special catalogue address the Deans of the respective Departments. General catalogues may be obtained from the Secretary of the University.

## DESCRIPTION OF THE NEW BUILDING.

ERECTED 1893.

The general plan consists of a central building to provide two large lecture rooms, one above the other; and of two wings, chiefly for laboratories, but also for library, museum, offices, recitation and private rooms.

An unusually well lighted, well floored, dry and commodious basement provides ample storage rooms, and also excellent rooms for the greater comfort of students, such as a study room, smoking room, etc.

The lecture rooms, laboratories, and all rooms except those in the basement are free from all posts and pillars; the two lecture rooms are abundantly lighted and ventilated, and have a seating capacity, the first floor lecture room for 485, and the third floor amphitheatre for 525 students.

The Microscopical Laboratory is believed to be unsurpassed in lighting and in ventilation and in size, accommodating 122 students.

The Students' Chemical Laboratory has the same size and superiorities.

The Dissecting Rooms are believed to be unsurpassed in all essentials, and can accommodate 204 students at work at the same time.

Lavatories and urinals are conveniently located on every floor.

The building supplies several private rooms for special work of students or graduates.

Lockers are amply supplied for the personal use of every student, to secure his books, instruments, overcoats, etc.

The college lot measures about  $256\frac{1}{2}$  feet front on Canal,  $199\frac{1}{4}$  feet on Villere street,  $313\frac{1}{4}$  feet on Robertson street, and  $102\frac{1}{4}$  feet on Customhouse street; containing, therefore, about 62,764 square feet, while the building occupies only 16,528 square feet; thus leaving ample space for ornamental and recreation grounds at present and for extension in the future.

3 0112 106099267

# MEDICAL DEPARTMENT, TULANE UNIVERSITY OF LOUISIANA.

Dimensions, 156 feet by 123 feet depth. Fronting Canal Street, between Villere and Robertson Streets. The Central Building measures 70 feet front by 88 feet depth, and each wing 40 feet front by 123 feet depth. The Building occupies 16,528 square feet of the college lot, which contains 62,764 square feet.
